[First Dose Moderna – Tuesday, 1/25/2022](#)  
[First Dose Pfizer – Friday, 1/28/2022](#)

**Anyone who needs a COVID vaccine can schedule** online by visiting: [www.wyomingco.net](http://www.wyomingco.net) and selecting “COVID-19 Vaccination” under *Quick Links* or by calling the Wyoming County Response Line at 786-8911. Locate other vaccine clinic locations at the Vaccine Finder [HERE](#).

**NEW:**

**When to use Covid Home Test.**

**COVID-19  
Testing**

If you have symptoms, test immediately

If you were exposed but don't have symptoms, test on day 4-5 (because the incubation period is 3 days)

When counting days, always count the exposure or first symptoms as day 0.

If you test negative, re-test the next day.

There is a new website, [covidtests.gov](http://covidtests.gov) where you can order 4 free at-home Covid tests per household.

- **WHEN YOU TEST POSITIVE FOR COVID-19:** New York State is moving toward a system of self-management when a person is positive for COVID-19 after being tested in a community setting (pharmacy, provider office, testing site etc.). According to the NYS Department of Health, residents who test positive for COVID-19 will be directed to a NYS website for isolation and quarantine

instructions. If you are COVID-19 positive, notify your close contacts that they have been exposed. NYSDOH “Frequently Asked Questions” about these changes can be found [<HERE>](#).

- **WHEN YOU TEST POSITIVE WITH COVID-19 AT-HOME TEST:** Wyoming County residents can visit [www.wyomingco.net](http://www.wyomingco.net) and choose “Report a Positive COVID-19 Home Test” option under the “Quick Links” to self-report a positive at home COVID-19 test. After submitting a positive result you will be able to print an “AFFIRMATION OF ISOLATION” if needed for school or work. The state is moving to self-management for anyone who tests positive or who is exposed.
- *The Health Department does not have free at-home test kits or KN95 masks at this time; please do not call or visit the Health Department for test kits or masks.*

The Wyoming County Health Department continues to offer COVID-19 testing on Monday, Wednesday and Friday each week. Testing will be “drive through” style at the Wyoming County Highway Department located at 4328 Route 19, approximately 4 miles south of the Village of Warsaw. Results are available the same day and there is no charge. To schedule an appointment for a COVID-19 test please visit the Wyoming County Website [HERE](#) or [www.wyomingco.net](http://www.wyomingco.net) and choose “COVID-19 Testing Clinic Registration” under *Quick Links*. Call the Wyoming County Response Line with questions or for assistance at 786-8911.

**Wyoming County Board of Supervisors Chairwoman, Rebecca J. Ryan** announced as of Thursday, January 20, 2022, the Wyoming County Health Department reports seven thousand twenty-two (7,022) lab-confirmed positive community cases of COVID-19 among Wyoming County residents. There is an increase of four hundred forty-nine (449) total cases since the last reported increase on Thursday, January 13, 2021.

County	Cumulative Positive	Weekly Reported Home positive	Weekly Reported Lab positive	Wyoming County Fatalities	# Wyoming County residents with at least 1 dose**	% of all Wyoming County residents with at least 1 dose
Wyoming	7,022	225	224	75	22,751	56.8%

*All data are provisional*

*\*\*Wyoming County residents with at least one dose of COVID-19 vaccine.*

Given recent changes announced by the NYS Department of Health, the format of weekly Press Releases may be subject to change. The NYSDOH COVID-19 data dashboard can be located here: <https://coronavirus.health.ny.gov/covid-19-data-new-york>. Community transmission of COVID-19 is very high, please wear a well-fitting mask in public settings and stay home and isolate from your household if you are sick.

The Centers for Disease Control and Prevention (CDC) also maintains a county-level [COVID-19 data tracker](#). The CDC tracker provides up-to-date information about COVID-19 testing, cases, hospitalizations, and deaths. The tracker contains data for all US counties allowing for regional comparisons.
